WentWest (Western Sydney Primary Health Network), Western Sydney Local Health District, and the Sydney Children's Hospitals Network are working in partnership to progress a whole of district approach to care in western Sydney. We invite you to participate in the HealthPathways Chronic Pain Working Group.

This process is part of the HealthPathways program which aims to provide easily accessible information to general practice via an online portal to be used within patient consultations. Whilst the portal is designed primarily to be used by general practice, it is also available to specialists, nurses, allied health professionals, and others, to support healthcare provision.

This meeting provides the opportunity for collaboration between GPs, specialists, nurses, and allied health professionals. It will include a review of current practice, identifying and implementing required changes to processes, and capturing this by localising and developing agreed communication processes, and assessment, management, and referral pathways, between primary, secondary, and tertiary care.

Learning Outcomes

1. Demonstrate an understanding of HealthPathways in western Sydney.
2. Identify issues in current practice in the assessment, management, and referral of chronic pain patients between primary, secondary, and tertiary care in western Sydney.
3. Identify improvements in practice which can be implemented to achieve optimal assessment, management, and referral of chronic pain patients, and improve the patient journey, in western Sydney.

RSVP by email to healthpathways@wentwest.com.au or Fax: (02) 9671 5515 by **COB Thursday 12th October**, with the following details.
